

## 5G base station site in Togo

Where will 5G be deployed in Africa? Espoo, Finland - Nokia today announced that it has been selected by African mobile operator, Togocom in a three-year deal to deploy 5G across the country. In the capital city Lomé, the 5G network has just been launched -- the first time a 5G network has been deployed in West Africa. Is 5G coming to West Africa? In November Nokia announced that it has been selected by African mobile operator, Togo Telecom in a three-year deal to deploy 5G across the country. In the capital city Lomé, the 5G network was subsequently launched -- the first time a 5G network has been deployed in West Africa. Where is togocom deploying 5G technology? (Togo First) - Last week, Togocom's MD, Paulin Alazard, revealed that the operator has deployed its 5G technology at the International Port of Lomé, in the Administrative Area, and Adakpè's Industrial Platform. This was during a session where the group presented the various actions it undertook to improve its services over the past 10 months. What is a 5G base station? As part of a network's wireless telephone system, a 5G base station is a fixed communication point that connects using a single or several antennas. It comprises a wireless receiver and a short-range transceiver with an antenna and analog-to-digital converters (ADCs) to convert radio frequency impulses to digital signals. Which operators are active in Togo? In Togo two operators are active: Togocel (by Togo Telecom) and Moov (by Maroc Telecom). Both networks broadcast on 900 MHz for 2G and 1800 MHz for 3G. In summer 4G/LTE licenses were issued to the two operators and Togocel and Moov both launched their 4G/LTE network in Lomé in June. Is Nokia a partner of togocom? Nokia is a long-term partner of Togocom and has previously supplied equipment for their 3G and 4G networks. Togocom is the Togolese market leader in telecommunications serving the entire country. Togo demos 5G while Togolese are still using 2G In November Nokia announced that it has been selected by African mobile operator, Togo Telecom in a three-year deal to deploy 5G across the country.
