

Albanian power storage equipment company

Who produces the most electricity in Albania?The Albanian Power Corporation (KESH) is the public producer and, at the same time, largest electricity producer in Albania. KESH operates the most important electricity generating plants in the country. Does Albania have a power supply security problem?Albania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable. What is the role of Kesh in Albania's energy system?By operating 79 per cent of the generation capacity in the country, KESH supplies about 70-75 per cent of customers' demand for electricity, provides the energy needed to cover losses in the transmission grid and guarantees the security of the Albanian energy system through balancing energy and auxiliary services. Does Albania have a hydro power plant?Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable. The total installed generation capacity has increased over the last few years because of new private investments in hydro power plants and more recently in small solar farms.
