

Energy storage ushered in grid reform

New Report: Market Reforms to Harness Energy Storage and While some regions of the United States have made progress integrating energy storage into energy resource portfolios, several organized electricity markets have yet to US states advance energy storage and grid The "50 States of Grid Modernization" quarterly report from NC Clean Energy Technology Center identified policy trends related to US grid modernization across the legislative session. Lawmakers OK sweeping energy reform package that governor Battery storage. The core of the bill is a new incentive structure for energy storage projects. The incentives are broadly similar to how the state funds renewable developments Mid-Year Recap: Storage, Energy & Capacity Executive Summary: The first half of has ushered in a wave of structural changes across U.S. wholesale electricity markets, with energy storage positioned at the center. US energy storage set a new record in Q1 US energy storage set a Q1 record in with 2 GW added, but looming policy changes could put that growth at serious risk. State by State: An Updated Roadmap Through the Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy sources.
