

Expanding battery energy storage facilities

QUEENS, NY --Today, New York City Economic Development Corporation (NYCEDC) and the New York City Industrial Development Agency (NYCIDA) announced the advancement of a key commitment in New York City's Green Economy Action Plan to develop a clean and renewable energy system. NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once Energy storage has a pivotal role in delivering reliable and affordable power to New Yorkers as we increasingly switch to renewable energy sources and electrify our buildings and transportation systems. Integrating storage in the electric grid, especially in areas with high energy demand, will The state approved a plan to convert the land into one of the nation's largest battery energy storage systems. Gov. Kathy Hochul wants New York to get the majority of its energy, from clean sources like solar, by . But since the sun isn't always shining, so-called "BESS" sites are critical for State officials have moved to accelerate approvals for large-scale storage facilities under laws such as the RAPID Act, part of New York's budget. The initiative is tied to the state's goal of reaching six gigawatts of storage capacity by . Since , more than 6,000 storage projects NYCEDC Advances Green Economy Action Plan with Support of QUEENS, NY --Today, New York City Economic Development Corporation (NYCEDC) and the New York City Industrial Development Agency (NYCIDA) announced the Energy Storage Program Here's a look at a few of the major BESS milestones that occurred in and an update on how battery energy storage is developing on both the North and South shores: One of the nation's largest battery energy storage sites is coming One of the country's largest battery energy storage sites is about to be built on Staten Island. It's part of New York's push for renewable energy. But families there say by the State by State: An Updated Roadmap Through the Washington has provided \$14.3 million through its Clean Energy Fund to utilities to deploy four utility-scale energy storage projects with the intention of testing different energy storage technologies and use Solar, battery storage to lead new U.S. generating capacity In , capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record January State of Charge With nearly \$2B in approved incentives, the programs will stimulate expansive energy storage growth state-wide and further drive the State towards achieving its goal of 6 GW of energy storage deployed by Battery Energy Storage Growing on U.S. Grid, But Facing Some Historic amounts of energy storage, primarily lithium-ion battery systems, are being added to the U.S. grid, driven by a need to balance renewable generation and to meet load Safety Concerns Grow Over Battery Storage ProjectsEPA Administrator Lee Zeldin joined Long Island residents on Tuesday to highlight concerns about New York's push to expand Battery Energy Storage Systems in densely U.S. Energy Storage Industry to Invest \$100 Billion in Today's investment commitment aims to advance a manufacturing expansion in the United States that could enable American-made batteries to satisfy 100% of domestic energy storage project NYCEDC Advances Green Economy Action Plan with

Expanding battery energy storage facilities

Support of Major Battery QUEENS, NY --Today, New York City Economic Development Corporation (NYCEDC) and the New York City Industrial Development Agency (NYCIDA) announced the Energy Storage Program The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the NYC battery energy storage sites: How development of the Here's a look at a few of the major BESS milestones that occurred in and an update on how battery energy storage is developing on both the North and South shores: State by State: An Updated Roadmap Through the Current US Energy Washington has provided \$14.3 million through its Clean Energy Fund to utilities to deploy four utility-scale energy storage projects with the intention of testing different energy January State of Charge With nearly \$2B in approved incentives, the programs will stimulate expansive energy storage growth state-wide and further drive the State towards achieving its goal of 6 U.S. Energy Storage Industry to Invest \$100 Billion in Today's investment commitment aims to advance a manufacturing expansion in the United States that could enable American-made batteries to satisfy 100% of domestic energy storage project
