

## Norway's 60MW hybrid energy storage project

Does Norway have a battery market? Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains P&#229;l Runde, Head of Battery Norway. Is Norway the 'battery of Europe'? Image: Ingrid Capacity. While Norway once aimed to be the 'battery of Europe' it has since been overtaken other Nordic countries Sweden and Finland for BESS deployments. Research firm LCP Delta's Jon Ferris explores the region's energy storage market dynamics in this long-form article. How big is Norway's battery market? batteries for stationary energy storage - a market expected to reach EUR 57 billion by . Now, a more mature Norwegian battery industry has greater potential to accelerate the renewable energy transition in Europe. Today Norway has not one, but two huge battery markets. Is stationary energy storage a good idea in Norway? Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstrøm was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight. How many GW of hydropower does Norway have? Norway presently has 32 GW installed capacity in the hydropower system and 85 TWh reservoir storage, providing 97 per cent of its own electricity supply. Studies have shown that it is possible to develop additional 20 GW of new capacity in the Norwegian hydropower without construction of additional reservoirs. Are EV batteries the future of energy storage? "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains P&#229;l Runde, Head of Battery Norway. An early adopter of electric transport, Norway continues to capture EV battery headlines. October 21, - Elinor Batteries has been awarded the contract to supply battery solutions for three large-scale battery parks in Southern Norway, boosting energy storage capacity, reducing grid costs, and supporting a faster transition to a low-emission society. Norway's maturing battery industry embraces green energy storage May 8, &ensp;&#;&ensp; Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable energy in the form of hydropower, strong government financial Elinor Batteries to supply batteries for grid-scale energy storage October 21, - Elinor Batteries has been awarded the contract to supply battery solutions for three large-scale battery parks in Southern Norway, boosting energy storage capacity, Sweden and Finland surge ahead of Norway May 14, &ensp;&#;&ensp; While Norway once aimed to be the 'battery of Europe' it has since been overtaken other Nordic countries Sweden and Finland for BESS deployments. Research firm LCP Delta's Jon Ferris explores the region's Oslo Three Peaks Energy Storage Power Station: Powering Norway's Jun 22, &ensp;&#;&ensp;a mountain range near Oslo where three peaks aren't just scenic viewpoints, but giant energy storage power stations working like nature's own rechargeable batteries. Norway Energy Storage Outlook Aug 1, &ensp;&#;&ensp; Repurposing used EV batteries for stationary storage bolsters the nation's energy resilience. Furthermore, Norway pioneers the exploration of
