

How is Bess transforming the Philippine energy industry? With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix. What is Bess technology? BESS technology, which enables the storage of energy both from renewable and non-renewable sources, was actually pioneered in the Philippines as far back as by what is now SMC's Masinloc power facility. That pioneering BESS project introduced the use of advanced lithium-ion battery technologies in the Philippines and Southeast Asia. What is Aboitiz Power's Bess project? Aboitiz Power commits P1.2B to a pioneering hybrid BESS project in the Philippines. This model, integrating battery storage into thermal plants, is a blueprint for climate-resilient energy and grid stability in Asia. How will the new Bess projects impact the Philippines? "We are very excited to start construction of the new BESS projects in the Philippines. With the new batteries we will more than triple our storage capacity to 80 MW, increasing the value of our hydro power plants and strengthening our position as a leading provider of ancillary services in the country. What is the outlook for Bess in the Philippines? While the outlook for BESS in the Philippines is bright, challenges remain. The DOE acknowledges the high upfront costs of battery storage systems. A lack of standardization and concerns about the environmental impact of certain battery technologies, particularly lithium-ion, also pose challenges. How many Bess facilities are there in the Philippines? We are operating BESS facilities at 32 locations in the Philippines, across the regions of Luzon, Visayas, and Mindanao. Overall, we are putting up approximately 1,000 MW of BESS facilities, which will help ensure the reliability of the grid, especially in areas that are in most need of power quality solutions. SMC Global Power The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. Our acquisition of Masinloc BESS is a landmark milestone that drives the Aboitiz Power Pioneers Hybrid BESS Project in the Unlike standalone renewable energy ventures, this project retrofits an existing oil-fired power plant. The BESS installation will help stabilize the grid by storing surplus electricity during low-demand periods and releasing it DNV assists Philippine battery energy storage project through to Co-located with SNAP's hydroelectric plant, the storage system uses liquid-cooled lithium-ion batteries and is connected to the grid via a 230-kV power transformer. Gov't bets on battery energy storage to power the The Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future. PBBM unveils SMC's nationwide BESS network seen to power It is part of the total 32 battery storage stations being built by SMC, through its San Miguel Global Power (SMGP) all over the country, the first and largest such network in the SMC unit to complete BESS network in January BESS technology, which enables the storage of energy both from renewable and non-renewable sources, was pioneered in the Philippines in by what is now SMC's Largest Battery Energy Storage Facility Up In Marcos Jr. led the inauguration last April 4 in Limay, Bataan, where SMC initially built its BESS facilities. It is part of the total 32 battery

storage stations with a total of MW of Scatec JV reaches financial close for 56 MW BESS The new capacity is building on the success of the existing 24 MW BESS connected to the Magat power plant, which has been generating solid ancillary services revenues since start of operation in . Aboitiz Power unit sign EPC for BESS project in LagunaThe company shared that the Bay Battery Energy Storage System (BESS) project, set in Barangay Bitin, Bay, Laguna, will integrate advanced battery storage technology into PBBM inaugurates one of the world's biggest President Ferdinand R. Marcos Jr. inaugurated on Friday the San Miguel Global Power Battery Energy Storage Systems Facilities (BESS) in Limay, Bataan. The BESS is the first of its kind in the Philippines and SMC Global PowerThe Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. Our acquisition of Masinloc BESS is a landmark milestone that drives the Aboitiz Power Pioneers Hybrid BESS Project in the PhilippinesUnlike standalone renewable energy ventures, this project retrofits an existing oil-fired power plant. The BESS installation will help stabilize the grid by storing surplus electricity during low Gov't bets on battery energy storage to power the nationThe Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future. Largest Battery Energy Storage Facility Up In Northern PhilippinesMarcos Jr. led the inauguration last April 4 in Limay, Bataan, where SMC initially built its BESS facilities. It is part of the total 32 battery storage stations with a total of MW Scatec JV reaches financial close for 56 MW BESS in the Philippines The new capacity is building on the success of the existing 24 MW BESS connected to the Magat power plant, which has been generating solid ancillary services PBBM inaugurates one of the world's biggest Energy Storage President Ferdinand R. Marcos Jr. inaugurated on Friday the San Miguel Global Power Battery Energy Storage Systems Facilities (BESS) in Limay, Bataan. The BESS is the SMC Global PowerThe Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. Our acquisition of Masinloc BESS is a landmark milestone that drives the PBBM inaugurates one of the world's biggest Energy Storage President Ferdinand R. Marcos Jr. inaugurated on Friday the San Miguel Global Power Battery Energy Storage Systems Facilities (BESS) in Limay, Bataan. The BESS is the
