

## Thailand New Energy Storage Entrepreneurs Tour

Is energy storage a viable business model in Thailand? The Provincial Electricity Authority (PEA) of Thailand will explore the feasibility of energy storage business models in collaboration with Nuovo Plus, a subsidiary of state-owned oil and gas company PTT Group. Can Bess create business opportunities in Thailand? Watcharin Boonyarit, director of solar energy development at the Department of Alternative Energy Development and Efficiency, noted the potential for BESS to create business opportunities as Thailand transitions to renewable power sources. "We should not only import BESS but also consider new investment projects in this battery business." Does Thailand need a battery energy storage system? Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The PDP draft included 10,000 MW of BESS, but this may see the country struggle to fulfil carbon neutrality and Net Zero commitments over the coming decades. What is Thailand's Power Development Plan? Thailand's power development plan (PDP) aims to increase renewable energy use, highlighting the importance of BESS alongside solar panels and wind turbines. This could create new business opportunities for entrepreneurs if prices decrease or new technologies emerge for stationary batteries. How many mw can a solar generator store in Thailand? Their total combined storage capacity was 994 MW. Interestingly, this allowed generators to sign semi-firm power purchase agreements (PPAs) with the Electricity Generating Authority of Thailand (EGAT) with minimum availability guarantees. Many solar projects in Thailand have non-firm PPAs in place due to a lack of storage on site. Could a sodium-ion battery be a new business opportunity in Thailand? The Federation of Thai Industries' Renewable Energy Industry Club sees potential in sodium-ion battery (SIB) production as an alternative to lithium-ion batteries. SIBs, made from rock salt, could offer a new business opportunity given Thailand's abundant rock salt reserves. Nexus Thailand Host events and meet-ups to connect entrepreneurs, corporations, education institutions, government agencies, and financial organizations to accelerate startups and remove barriers for entrepreneurs. Wenergy Launches Green Energy Storage Project in Thailand, The launch event also featured a lively discussion on Thailand's energy landscape and the potential of green energy storage technologies, with representatives from government, Thailand's renewable energy plan boosts battery Thailand's power development plan (PDP) aims to increase renewable energy use, highlighting the importance of BESS Thailand Needs More Battery Energy Storage Systems In , the Energy Policy and Planning Office (EPPO) partnered with relevant agencies to create an action plan promoting Thailand's battery energy storage industry. Four Thailand's New Energy Storage Revolution: Innovations This tropical paradise isn't just about pad thai and full moon parties anymore - it's becoming Southeast Asia's new energy storage powerhouse. With renewable energy Thailand's emerging energy storage sector Energy storage is in its infancy in Thailand, and new business models are already emerging. As the regulatory framework adapts to accommodate new players in the market, it [Insight] Thailand's Energy Revolution: Solar, Storage, and Tax The ASEAN Smart Energy and Storage Expo (ASEE), set for March 25-27, , at Bangkok's IMPACT Exhibition Center, will be a pivotal platform for global energy players. Is Net-Zero in Thailand
